Passionate marketing professional turned software engineer with seven years of experience producing effective marketing campaigns. Strong problem-solving and customer service skills supported by a deep commitment to code quality. Familiar with design patterns and unit testing, with the ability to pick up new technologies quickly and apply them in a fast-paced environment committed to growth and innovation.

TECHNICAL SKILLS

- Java
- PostgreSQL
- JavaScript
- Spring Boot
- HTML & CSS
- Vue.js
- Git
- Responsive Design
- Unit Testing (JUnit)

PROJECTS

Bug Wars | Java, PostgreSQL, Spring Boot, TypeScript, Vue.js

- Created the game lobby landing page and set up navigation routes.
- Integrated the script editor page with backend APIs to enable fetching, creating, updating, and deleting scripts.
- Wrote unit tests for script implementation including fetching, creating, updating, and deleting scripts.

Online Bookstore | Java, PostgreSQL, Spring Boot, JavaScript, Vue.js

- A full-stack application that displays products for purchase at a bookstore.
- Customers can create an account, browse a curated selection of self-improvement books, and add them to their personal shopping cart.

Exchange Rate Calculator | JavaScript, HTML, CSS

- An exchange rate calculator that converts global currencies to produce accurate foreign exchange rates. This project is built with JavaScript and utilizes the ExchangeRate API.

EDUCATION

Tech Elevator | Remote

April 2023 – December 2023

Graduated from a 30-week full-stack coding bootcamp learning how to create dynamic web-based software systems using Java and providing 800+ hours of development education and application.

Virginia Commonwealth University | Richmond, VA

August 2012 – May 2016

Bachelor's Degree, Mass Communications - Creative Advertising

PROFESSIONAL EXPERIENCE

University of Pittsburgh | Pittsburgh, PA

August 2019 – Present

Marketing Office Coordinator

- Developed an A/B testing procedure to student newsletter resulting in a 30% increase in open rate.
- Streamlined event planning processes by implementing project teams that assembled a group of 12 cross-functional staff members utilizing the DARCI framework.
- Generated custom outreach reports for staff to track 1,600+ students resulting in 34% increase in event attendance and 122 additional unique engagements in an academic semester.
